Goran Vuja   Senior Software Engineer

MAIN SKILLS

👉 React, Vue, Angular, React Native, Node

SKILLS

- Languages : HTML5, CSS3, Java, JavaScript, ECMA 6+, Typescript, PHP, Python, Solidity.

- Libraries : React.js, Redux, Axios, jQuery, D3.js, Fabric.js, web3.js, ethers.js

- Frameworks : Gatsby.js, Next.js, React Native, Vuex, Vuetify, Laravel, Django, Node.js, Express.
  Spring(Core, MVC, Boot, Data, Cloud), Kotlin

- Frontend UI Templates : Bootstrap, Tailwind CSS, Material-UI, Semantic-UI, Ant Design, Fluent UI

- Database : MySQL, MongoDB, PostgreSQL, SQLite, Firebase

- Agile Methodology: Scrum, Kanban

- CI/CD: Jenkins, Bamboo, CircleCi

- Others: Jest, Mocha, Jasmine, Cypress, Jira, Trello, GitHub, Bitbucket, AWS, BlueHost, GoDaddy

EXPERIENCE

DELIGHTECK, Singapore - *Senior React Native Developer (Part-time)*

June 2022 - October 2022

- Native Apps development on Android and cross-platform Apps in React Native.
- Implemented the BRIDGEs to use the GroundSDK (developed by Swift) in React Native
- Insured code robustness by using Typescript on React Native mobile Frontend.
- Used Firebase's live database update notifications to enable real time messaging with push notifications
- Experience in refactoring error message handling design by implementing React Native alert dialog resulting in a potential decrease of user input errors.
- Transformed native iOS to React Native
- Developed the Dapp with React Native, Typescript, Grommet UI and Web3.js.
- Worked in developing mobile apps using React Native and its concept.

IT WONDERS WEB PTE.LTD, Singapore — *Senior React & Java Developer*

March 2020– May 2022

- Designed the Front-end applications and Mobile Application As well for user interactive (UI) web pages using web technologies like HTML5, CSS3, ES6 JavaScript, TypeScript, React.JS, Next.JS and React-Native/Redux Saga.
- Involved in Requirements gathering, Analysis, Design, Development, and Testing of the application using AGILE methodology (SCRUM).
- Implement authentication and validation middlewares with Firebase.
- Drove React.js front-end development in collaboration with cross-functional and Scrum teams, including participation in daily Scrum calls, Git version control, task management on Jira, and communications via Slack.
- Worked in developing mobile apps using React Native and its concept.
- Used NextJs for server-side rendering for better performance and for SEO.
- Used React 16.8's new feature Hooks to rewrite/re-factor front-end applications and truncated down 20% codes.
- Implemented full stack applications in Java, SQL, JavaScript, Angular, Spring, REST, JSON, Spring Data JPA
- Maintenance of current products and implementation of new functionality using such technologies as Java, NodeJS, JavaScript, Kubernetes, Helm, Tilt, Jenkins
- Full support of small microservices based on Spring Boot: implement codes+tests, control of logs in Kibana, start/restart pods in Rancher, controlling the state of microservice in Grafana

American Financial Group, Cincinnati — *Senior MERN, MEAN Developer*

February 2018 – December 2019

- Built frontend of SaaS product web application using React.js and implemented A/B tests.
- Assisted in creating a CI/CD pipeline using technologies such as AWS CodeBuild.
- Assisted in developing REST APIs using NodeJS, Express, and MongoDB.
- Experience working on Redux Unidirectional data-flow achieving the predictable application behavior.
- Developed and maintained the major product for the company, refactored the code in PHP Project to Vue project for some major features.
- Main focus being Angular 6+ to develop responsive web applications. Utilize micro-services and RESTful API calls with heavy emphasis on shared components and reusable code.
- Implemented responsive Ionic pages, custom Angular components and overall styling.
- Contributed to the development of an internal forecasting application using Angular for the front end.
- Utilized ag-grid to effectively add data to grids and Highcharts for graphical data.

TITANSOFT, Singapore — *Junior FullStack Developer*

July 2015– October 2017

- Worked closely with business-side clients to deliver attractive, easy-to-understand screens that appropriately reflected the company's fulfillment workflow.
- Implemented Agile/SCRUM methodology for iterative application development, weekly sprints, stands up meetings, and customer reporting backlogs.

- Initiated calls for triggering or fetching data from Restful API provided by the backend team using JAVA.
- Enhanced user experience by designing new web features using MVC Framework like Laravel and Node.js.
- Developed multiple applications using progressive JS framework VueJS for front-end and Laravel for back-end.
- Working in PSD & Figma Design comps developing HTML/JavaScript/CSS based web sites, including testing and debugging cross-browser.

EDUCATION

PSB Academy, Singapore — *Bachelor's Degree*

April 2011 – March 2015
