SUMMARY

• Full Stack Developer with over 6 years of experience in Laravel, MEAN, MERN, MEVN, Python.
• I have joined 3 enterprise companies and 2 startups during my career and built successful   e-commerce websites, admin dashboards, and landing pages.
• 3 words to define myself are Excellence, Consistency, and Respect.

EXPERIENCE

Simon Property Group, Indianapolis — *Full Stack Developer*

May 2019 - May 2022

Main Skills: React | Vue | Next | Nuxt | Vuetify | Quasar | Node | MongoDB | Restful API

• Developed Shopping System by using NextJS for front-end and NodeJS for back-end.
• Applied optimization techniques to reduce page size and load times to enhance user experience using sprites.
• Maintained safe and detail-oriented cash handling policies to ensure accuracy while assisting clients and personnel with large volume transactions, incoming/outgoing cash shipments, and reconciling employee and vault assets.
• Assisted with store opening and closing duties, inventory logging, and database management of incoming and outgoing product shipments.
• Communicated with other teams and senior management to adapt 30+ clients' websites to adapt to changing industry standards.

DELIGHTECK, Singapore — *Full Stack Developer*

October, 2016 - February, 2019

Main Skills: MERN Stack | MEVN Stack | AWS Lambda | Jest | Gatsby | Restful API
• Created engaging curriculums for artistic, cultural, linguistic, scientific and culinary courses by using the MERN Stack.
• Developed user interface by using React, Redux and React UIs (Material UI, Semantic UI) for SPA development.
• Interacted with Unit Testing with Jest and Mocha.
• Introduced wider use of isomorphic, fuse theme and Node.js for web applications, decreasing load times by roughly 40%.

IT ENGINE, Novi Sad — *Front End Developer*

August 2014 - April 2016

Main Skills: Laravel | React | MysQL | Node | PHP | Bootstrap | jQuery | Restful API | Mocha
• Developed full-stack applications across various platforms using latest industry-adopted technologies and Laravel framework.
• Conducted peer-reviews of PHP application code to make sure that all code complies with team and organization standards.
• Conducted unit and load testing for high profile customer facing applications, which reduced system failure rate by 70%.
• Responsible for writing server-side web application logic. develop back-end components, connect the application with the other (often third-party) web services and support the front-end developers by integrating their work with the application.

EDUCATION

Singapore Institute of Technology,

April 2010 – March 2014,   B.Sc. Computer Science

SKILLS

► Front-end

HTML, CSS, JavaScript, React, Vue, Next, Nuxt, Vuetify, Quasar, TypeScript, jQuery, Bootstrap, Material UI, Angular, etc.

► Back-end

(Laravel, CodeIgniter) / PHP, ExpressJS / Node.js, Django / Python

► Database

MySQL, MongoDB, PostgreSQL, firebase.

► Web Hosting

AWS (Amazon Web Server), Bluehost, Godaddy, Apache, Cpanel.

► Mobile development

Flutter, React Native

► Blockchain

- Crypto Coins Exchange Development
- NFT (Non Fungible Token) Marketplace Development
- Smart-Contracts (Solidity, Truffle framework)
- Smart Contracts Audits
- Token development based on Ethereum and Binance (ERC20, ERC721, ERC 1155, BEP20, BEP721, BEP1155)
- DAPP with web3.js
- ICO & IDO Development with Created Token (Coin)

► Source Code Management Tools

Git, GitHub, GitLab, Bitbucket

LANGUAGES

English
